To: Manufacturers of backflow prevention assemblies From: Paul Schwartz, Chief Engineer Date: 11 April 2018 Subject: Errata 18-001 – Corrections to the Standard

The Foundation has determined that there are clerical errors in the Table 10-7 of the 10^{th} Edition Standards contained in Chapter 10. The rated flow for $\frac{1}{2}$ " AVB's and PVB's was mistakenly printed as five (5) gallons per minute (GPM), rather than fifteen (15) GPM. In addition, the metric conversions of liters per second (L/s) have been corrected. The Table 10-5 from the 9th Edition Standard is shown below to illustrate the correct flow rate was previously used.
