

NOTICE 03-001

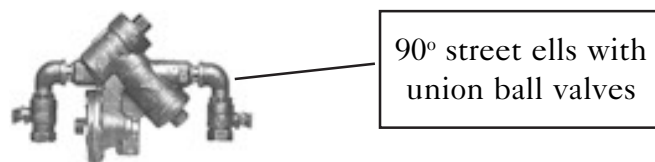

It has come to the attention of the Foundation from field reports that there has been an improper marking of model designations for the following assemblies:

Wilkins Reduced Pressure Principle Backflow Prevention Assembly

Model 975XLSE ¾”, 1”, 1-1/4”, 1-1/2”, 2”

Model 975XLSEU ¾”, 1”, 1-1/4”, 1-1/2”, 2”

A limited number of the above assemblies have been produced without the “SE” or “SEU” suffix in the model designation, and the only model designation shown on the unit is “975XL”. The correct model number should be stamped on the serial number pad, located on the top of the body of the first check valve.

Should you have an assembly affected by this Notice, contact Wilkins Regulator Company at (805) 238-7100.
