Notices

REGARDING RENEWALS:

The original Certificate of Approval—identified by the Edition of the Manual and the approval date shown in this list is valid as of the date of this list, only if the original or renewal date shown hereon is within three (3) years of the date of this list. The responsibility to request a renewal of an Approval is that of each manufacturer. The USC Foundation retains the right of determining the extent of re-evaluation required before renewal is granted. Certificates of Approval are not recalled for the purpose of updating the effective date. This revision of date is only published via the current List of Approved Backflow Prevention Assemblies.

REGARDING INSTALLATION:

Unless otherwise specified by the manufacturer all assemblies are to be installed on cold potable water applications - below 110oF. Also, all of the assemblies listed are Approved for the INDICATED ORIENTATION(S) ONLY. Rotation of assemblies on either axis will invalidate the USC Foundation's Approval. Use of spare parts other than those of the original manufacturer invalidates the Approval. Rotation of shutoff valves of one bolt hole only is permitted only for the 2 1/2" and larger flanged assemblies.

REGARDING LEAD CONTENT:

In order to determine if backflow preventers comply with lead-free requirements of several states and the Safe Drinking Water Act, USC Foundation Approved assemblies which comply with the $\leq 0.25\%$ lead requirement are indicated by a Y in the column $\leq 0.25\%Pb$.

REGARDING LIST UPDATES:

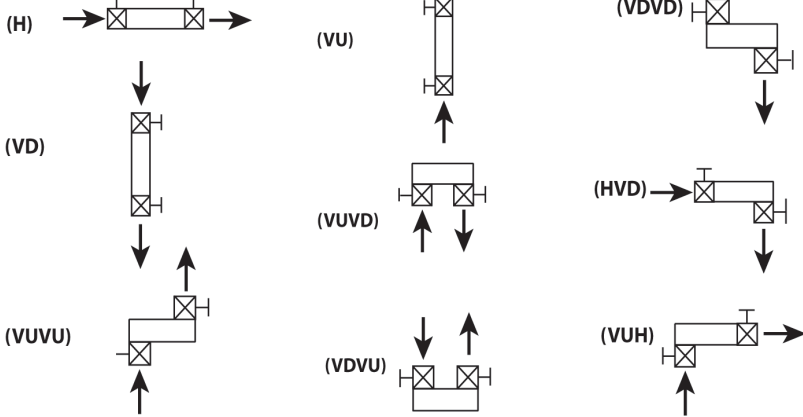

The List of Approved Assemblies is printed annually in the first quarter of the year. Update notices are printed and sent to USC Foundation Members quarterly. The most recent changes to the List may be found on the USC Foundation's website. The web version of the List is updated each time a change is made.

REGARDING SUSPENSIONS:

As part of an assembly's ongoing approval process, manufacturers are required to submit selected assemblies for review and re-evaluation. When a manufacturer fails to provide a required assembly, the assembly's approval is suspended. Once the assembly satisfactorily completes the renewal review and re-evaluation, the suspension will be removed.

Orientation of Assemblies

DC, DCDA, RP, RPDA

Key (H) Horizontal (D) Down

(V) Vertical (U) Up

AVB

PVB/SVB

Sample

Inlet- Vertical flowing down
Outlet- Vertical flowing up

Shutoff Valve Designation

Each backflow prevention assembly has been evaluated with a specific set of shutoff valves as an integral part of the assembly. The specific shutoff valves are coded by a parenthetic code with each assembly. This coding of shutoff valves is defined below. Other shutoff valves having similar performance characteristics which permit the assembly to comply with the standards are also shown immediately after the original shutoff valves. The use of any shutoff valve, other than those listed for that specific assembly invalidates the Approval. Assemblies listed with a Y in the “spare parts only” column may not include the shutoff valve designation.

Detector Assembly Meters

The Detector Assemblies contained herein have been evaluated with a specific meter as the detector element of the assembly. That specific meter is coded by a parenthetic letter shown in the “meters” column. The coding of meters is shown in this Section. Other meters having similar performance characteristics to permit the assembly to meet the Standard are shown immediately after the original evaluation meter. The use of any other meter or modified bypass piping invalidates the Approval.

Some of the detector assemblies use a line-size assembly, which is not a standard stock Approved assembly. Increased loads are required in these line-size units to allow the assembly to accurately record low flow rates in the bypass meter. Therefore, various off-the-shelf components can not be assembled and expected to perform satisfactorily. The bypass backflow preventer Approved with the detector assembly is listed under the bypass column. This is only for verification purposes. Should replacement parts or a complete bypass be needed, the model number of the complete detector assembly should be used in ordering these components.

A	Hersey Model F-F 5/8" x 3/4"
B	Carlton 5/8" x 3/4"
C	Dandé Model D-3 5/8" x 3/4"
D	Gamon-Calmet 5/8"
E	Hays Acumeter 5/8" x 3/4"
F	Arad 5/8" x 3/4" (Master Meter)
G	Schlumberger 5/8" x 3/4" Model MBRF
H	Rockwell (Sensus) SR-II 5/8" x 3/4"

Special Notices

The USC Foundation publishes Special Notices from time to time. These notices contain information that requires special attention. The Foundation makes Special Notices, in their first year of publication, an exclusive benefit for Foundation members. Members receive all Special Notices via mail immediately upon release. Please visit fccchr.usc.edu/list to view the Special Notices archive.

Notice 96-001

This notice lists Ames assemblies which have been reported with low check valve readings. Corrections to the problem are discussed.

Notice 97-001

This notice discusses changes in the retaining cup in the relief valve stem of the 8" and 10" Wilkins 975 reduced pressure principle assemblies.

Notice 97-002

This notice identifies Ames 2000SS, 3000SS, and 4000SS series assemblies that were discovered to have unapproved components.

Notice 97-003

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 98-001

This notice advises members of certain action in the Federal Register regarding cross-connection control programs.

Notice 98-002

This notice advises members of Wilkins 950 series and 975 series modifications.

Notice 99-001

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 99-002

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 99-003

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 01-001

This notice discuss silicon parts in certain Febco relief valves.

Notice 01-002/Revised Notice 01-002-R1

This notice discusses some check valves not approved in certain Ames and Watts assemblies.

Notice 01-003

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 02-001

This notice explains there are some specific Febco assemblies with unapproved check valve retainers.

Notice 03-001

This notice explains there are improper markings of model designations on some Wilkins assemblies.

Notice 03-002

This notice explains the possibility of the interference of the check valves on some Ames and Watts assemblies.

Notice 04-001

This notice identifies some Febco 825YA assemblies sold with a dimensional variation.

Notice 05-001

This notice identifies some Ames and Watts assemblies sold with unapproved disc material.

Notice 06-001

This notice identifies unapproved guides found in certain Febco assemblies.

Notice 06-002

This notice identifies a change in the design of the Flomatic PVBs.

Notice 06-003

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 07-001

This notice discusses out of tolerance springs on Conbraco assemblies.

Notice 09-001

This notice highlights unapproved third party components that are being distributed.

Notice 13-001

This notice discusses modifications to guiding surfaces of the check valves on Wilkins assemblies.

Notice 14-001

This notice lists assemblies which were NOT Approved by the Foundation, although advertisements may have implied otherwise.

Notice 14-002

This notice clarifies the method in which the model designation is indicated on the Wilkins 3/4" 950XLD and 975XLD assemblies.

Notice 15-001

This notice has been prepared to review Special Notice 14-002 and clarify the USC Approval Status of Wilkins Reduced Pressure Principle Detector Assemblies (RPDAs).

Notice 19-001

This notice brings to attention that certain Ames and Watts double check detector assemblies (DCDA) may have been produced with the bypass assembly containing the incorrect model designation.
